

ENHANCEMENT: Pasture and Hay Planting, convert to natives. (ac) \$238

BENEFITS

(SHORT DESCRIPTION OF ENHANCEMENT BENEFITS)

- A mixture of natives will create the greatest diversity. However, to manage these areas for grazing a single species should be selected for each field. The same native species is not necessary in each converted field to increase the grazing period/opportunity.

CRITERIA

To be eligible for this enhancement payment, fields must meet the following criteria.

- 80% of the field must be established to the targeted species.
- NRCS must be involved in the planning and planting of these plants as they are very hard to establish.

RECORDKEEPING

In order to verify performance with these criteria, you must complete the following records.

- Spot checks/field visits will be made to certify planting. Seed tags shall be maintained to verify amounts planted.
